

This App is made to send attendance, tests, fees, timetable, homework, classwork, etc like messages with photographs in Gujarati from mobile device to students on behalf of School, College and Classes

---

## Any Time Any Where

---

### Usage of Diary

How convenient it would be if parents could have information like attendance, tests, fees, etc. of their child in their mobile device?

If parents could directly access homework, classwork, notices from mobile rather than manual diaries, it would be even better.

And if parents can put sudden leaves in their own language with important photos from mobile while sitting home to teachers, How Easy the management and communication could be!!

No SMS limit and expense, of all student open data problem like in the Whatsapp group .... just institution's private app where Admin can send messages to all the students of class and parents can receive just information of their child.

If the user has logged in as Admin, he can see only message menu. Only Primary type or Main type user can access and manage Setups. (Admin type users can just send messages)

### Basic Information (Setup) :

- 1) First, Create the standards in setup menu as per requirements (E.g. 1, LKG, 12Sci)
- 2) Create Divisions (E.g. A,B,C)
- 3) Set the name of Teachers(Faculties) which we shall use later in attendance and Tests (E.g. Raj sir, Juhi Madam)
- 4) Set the rounds of tests (E.g. January)
- 5) Create the subjects for tests (E.g. Gujarati, English)

### Teacher (Admin) :

Set the Name, Number and Password for the teacher whom you want to give the admin application. The admin whom you want to just send messages, select Admin in Admin Type and the admin whom you want to give authorization to change in settings and add members, select Main in Admin Type.

You may include passport size photograph of admin. (size of photos will be automatically decreased)

Note: If you want to close any admin from list, just click on  and It will convert into X sign. X sign shows that admin has been closed

**Students (Member) :**

- Set the name, number, class, division, etc. of students whom you want to give user application
- Set student's number as Mobile1 and Parents' number as Mobile2 and Mobile3
- Set Passport size photo of student (Photo will be resized automatically)
- If you want to close any student from list, just click on ✓ and It will convert into X sign. X sign shows that student has been closed
- If you want to create new Class, Divisions, You can directly do it from Setup menu.

Note: If students data is already set in excel format,

- 1) First download the file 'Sample Excel' from Dashboard
- 2) Set the data as per given columns. The name of sheet must be 'Sheet1'.
- 3) Click on 'Import Member' to select file and import the data
- 4) You must create Class, Divisions as per mentioned in excel sheet from setup menu.
